Signal Extenders

BZBGEAR HDMI Extenders Over Category Cable

BZBGEAR HDMI extenders over category cable provide a reliable solution for transmitting high-quality video and audio signals over long distances using cost-effective Ethernet cables. Whether you are extending 4K or 8K video across a large venue or connecting multiple devices in a corporate environment, BZBGEAR extenders ensure clear, uninterrupted signal transmission. With models supporting advanced features like bidirectional IR, Power over Cable (PoC), audio embedding/de-embedding, and support for formats up to 8K@30Hz and 4K@120Hz, these extenders cater to a wide range of applications, from simple setups to professional AV installations.

What sets BZBGEAR HDMI extenders apart is their diverse range of options and robust performance. Designed to maintain signal integrity over distances of up to 328 feet (100 meters), these extenders leverage advanced HDMI and HDBaseT technology to ensure minimal latency and superior image quality.

BG-EXH-150C

4K UHD HDMI HDBASET LONG RANGE
EXTENDER WITH BI-DIRECTIONAL IR/RS-232/CEC
UP TO 490FT

This device with a help of HDBaseT technology will extend HDMI signal for up to 150M (492 ft) with resolutions for up to 4K@60Hz using single CAT6 ethernet cable. But probably this is not the only feature you are looking for.

So, it can do much more – along with HDMI it will extend IR and RS-232 signal, so you can control your TV from the source side (for example, when using 3rd party control system) or you can control the source (like your cable box) from the TV side.

Wall Plate Extenders

An AV wall plate extender kit provides a seamless solution for extending HDMI or DisplayPort signals over CAT cable while offering a clean, integrated installation. The kit includes a transmitter, which connects to source devices like HDMI, DP, or USB-C inputs, and a receiver that transmits the signal to a display.

The system supports extended transmission distances of up to 164ft (50m) at 4K@24Hz or 115ft (35m) at 4K@60Hz over CAT6 cable, ensuring high-quality video and audio performance. The transmitter is housed in a sleek one-gang Decora-style enclosure, while the compact receiver can be discreetly mounted behind the display. Features like Power Over Cable (POC) simplify installation by powering the transmitter via the receiver, reducing cable clutter.

These AV wall plates are ideal for a variety of applications, including home theater setups, professional AV installations, and conference rooms.

Fiber Optic Extenders

Fiber optic extenders are advanced devices designed to extend data transmission over long distances using fiber optic cables. Unlike traditional copper cables, which are prone to signal degradation over extended runs, fiber optic cables transmit data as light signals. This enables ultra-fast speeds, exceptional signal integrity, and significantly longer transmission distances.

Fiber optic extenders are devices designed to extend the range of data transmission over long distances using a fiber optic cable. Unlike traditional copper cables, fiber optic cables transmit data as light signals, which allows for higher speeds and greater distances without signal degradation. These extenders are essential for applications where high-quality, high-speed data transmission is critical, such as in medical imaging, broadcast studios, and corporate environments.
